EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with William Schaal (39,018) on 01/19/2007.

The application has been amended as follows:

Please enter the attached amendment (pages 1-4) amending claims 1, 3, and 4, has claims 6, 7, and 10-20 canceled, and adds new claims 21-27.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance: In addition to applicant's remarks (The primary reasons for allowance is the inclusion of the following limitations in each independent claim directed towards a method adapted for a network including a client and a plurality of local domains including at least a first local domain and a second local domain:\

" substituting the Base URI for a HyperText Markup Language (HTML) Base tag within each of the first packets by the personal content directors of at least the first and second local domains, the HTML Base tag substituted by the personal content director of the first local domain now points to the first local

domain and the HTML Base tag substituted by the personal content director of the second local domain now points to the second local domain; and

transmitting the first packets with the HTML Base tags by the personal content directors to the client;

incorporating an earliest first packet received by the client from the plurality of personal content directors into a data stream and disregarding the later received first packets; and

accessing the local domain associated with the personal content director that transmitted the first packet earliest received by the client for subsequent data requests" (as from Claim 1, similar limitations in Claim 21).

This subject matter is not found in the prior art, nor is it obvious in view of the prior art.

The cited prior art, U.S. Patent 6,742,044 by Aviani et al. discloses a first received response is used to determine a domain for a client to subsequently access. However Aviani does not substitute a Base URI for HTML Base tags pointing to a corresponding local domain. In regards to the cited prior art relating to HTML Base tags, U.S. Patent 6,158,598 by Farber, the examiner agrees with applicants arguments found on pages 6 and 7 of the remarks filed 11/06/2006.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Examiner Comments

3. The rejection of Claim 1 under 35 U.S.C. 112, second paragraph, is withdrawn.

Art Unit: 2155

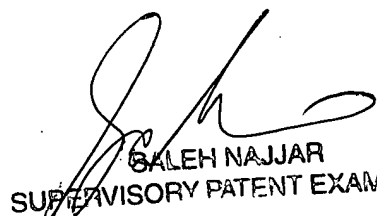

4. Claims 6 and 7 are cancelled by the examiner's amendment as the subject matter was essentially redundant to limitations in claim 1 based on the filed amendment.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to David Lazaro whose telephone number is 571-272-3986. The examiner can normally be reached on 8:30-5:00 M-F.
